# GeoPlatform Portal

Go here: https://stg.geoplatform.gov
Last Modified – 2/18/2019

What is it?

Intuitive, easy-to-use site for finding geospatial data, creating maps and galleries, storing community content, and announcing new services and upcoming events.

Features include:

- View community's content and information.

- View information on upcoming services and events.

- Find geospatial data.

- Create maps and galleries.

- Create an account.

Instructions:

1. *Find and try each of the above features*
   a. *Usable? If not, why not?*
   b. *Intuitively obvious? If not, got a suggestion for making it better?*
   c. *Feelings? (Like/Dislike/Meh)*
2. *Spend quality time with it. Try the use-case scenarios below then invent your own.*
3. *Find a bug? Please send any bugs, questions, comments, or recommendations to Lara Duffy at* larad@imagemattersllc.com
   a. *Include in subject line: "Portal Beta Test"*
   b. *Don't hold back! Send us feedback as you go.*
   c. *Let us know soonest if you need help or have questions.*
4. *If you are having trouble logging in, you may be experiencing issues with Single Sign On (SSO) when switching between Beta and Production environments. Please clear your browser's cache and cookies, and then refresh the page (e.g <ctrl>-F5 and try again).*

UC-1: Exploring the site

Precondition: None.

Steps:

1) Go to http://stg.geoplatform.gov.
2) As you scroll down the page, you see Featured content, Account Registration, Portfolio Resources, Application and Services, and Partners.

Postcondition: You saw all items listed in step two.

UC-2: Menu

Precondition: None.

Steps:

1) On the geoplatform home page (https://stg.geoplatform.gov), select "**More**" in the top right corner.
2) Select a few links to ensure they go to the correct page.
3) Navigate back to the GeoPlatform home page.
4) Scroll to the bottom, select "**Menu**" in the lower left and test a few more links.

 Postconditions: The main menu and the footer menu are the same and the links work.

UC-3: Moving the Map

Precondition: None.

Steps:

1) Go to http://stg.geoplatform.gov.
2) On the upper right of the homepage there is a map. Use your mouse to zoom in and out, and click and hold to drag the map.

 Postconditions: The map moved as expected.

UC-4: Using the carousel

Precondition: None.

Steps:

1) Go to http://stg.geoplatform.gov.

2) Scroll down to the "**Explore Portfolio Resources**" section.

3) Click the arrows to the right and the left.

4) The sections should scroll.

5) Click the search button on a few sections.

6) The Search page should open for that object type.

7) In the carousel, click the "**Register…"** or **"Create…"** button on few sections.

8) You should be redirected to the register or create pages.

Postconditions: The carousel scrolled and the links navigated to the appropriate pages.

UC-4: View the Item Details page

Precondition: None.

Steps:

1) Go to http://stg.geoplatform.gov.

2) In the top menu bar, click "Explore Resources" and select Datasets, Services, or Layers.

3) Select one of the trending items. This should open up the Item Details page for that object.

4) Using the buttons on the side, click "Open" to view the item in Object Editor or click "Export" to export it into one of the three formats.

5) If there are datasets or services associated with the object, select those as well. That should take you straight to that dataset or service page.

Postconditions: The item opened in Object Editor, the download worked, and everything went as expected.
